

Patient Assessment

Scene Survey

- 1- Scene Safety
- 2- Mechanism of Injury/ Nature of Illness
- 3- Body Substance Isolation
- 4- Triage

- A- Alert
- V- Verbal
- P- Pain
- U- Unresponsive

Primary Survey

- M- Massive hemorrhage management
- A-Airway with cervical spine stabilization
- R-Respiratory
- C-Circulation
- H-Hypothermia/Hyperthermia and Hike vs Helicopter

Secondary Survey

Head to Toe

Areas of major bleeding

- C-Chest
- A-Abdominal/Pelvis
- R-Renal/Retroperitoneal
- T-Thigh
- S-Skin/Street

Assessment of extremities

- C-Circulation
- S-Sensation
- M-Motor Function

Vitals

SCTM:			
PERRL:			

History

- S- Signs/Symptoms
- A- Allergies
- M-Medications
- P-Past Pertinent Hx
- L-Last ins/outs
- E-Events
- C- Character
- O- Onset
- L- Location
- D- Duration
- E- Exacerbation
- R- Relief
- R- Radiation

Plan & Problem List

Subjective/Objective/Assessment/Plan

Cervical Spine Assessment

- C- Cervical midline tenderness
- S- Sensory and/or motor deficit
- P- Pain or psychological distractor
- I- Intoxication
- N- Neurological deficit
- E- Events

Patient with Altered Mental Status

- A- Allergies/ Altitude
- E- Environment/ Epilepsy
- I- Infection
- O- Overdose
- U- Underdose
- T- Trauma
- I- Insulin
- P- Psychological disorder
- S- Stroke
